

Tuesday 31 August 2021

SmartCrete CRC at Concrete 2021 conference.

SmartCrete CRC will be hosting a conference session at the upcoming Concrete Institute of Australia's Biennial National Conference, Concrete 2021 on 7 September 2021 from 3.45 pm to 5.00 pm. This year, due to CoVID restrictions, the conference is being held virtually from 5-8 September allowing a greater number of delegates to attend from the comfort of home.

The SmartCrete CRC session will include a presentation on the organisation's progress by the CEO, Dr Warren South, three presentations by representatives of industry and academic partners of the CRC, and a facilitated discussion answering your questions on SmartCrete CRC and to allow the organisation to harvest ideas informing SmartCrete CRC's research portfolio.

Dr Warren South, CEO of SmartCrete CRC commented:

“SmartCrete CRC welcomes this opportunity to engage with its stakeholders through the largest concrete conference in Australia. We look forward to discussing our progress in a busy first year as well as hearing the issues and opportunities from the concrete community”

SmartCrete CRC is actively operating with the goal to ensure the long-term viability of vital existing and future concrete infrastructure through improvement in cost, application, and sustainability. The organisation achieves this by facilitating connections between industry and academia to generate research projects then funding those projects to realise the value of this research to the Australian concrete eco-system.

SmartCrete CRC does this by providing contacts, connections, and funding for successful research projects to address the various issues and challenges for concrete, especially in its application in infrastructure.

Registration for the conference is still open at <https://ciaconference.com.au/registration/>
